

planyo® The most flexible reservation system you'll find

If you're close to giving up on finding a reservation system which will work for your specific needs, you finally found the right system!

This short presentation will give you a quick overview of how Planyo can be used for your business. With Planyo you will:

- **Increase the number of reservations** by giving immediate price quotation and availability information as well as instant booking confirmation
- **Attract more customers** by allowing bookings to be made in **19 languages**, on a PC or mobile device
- **Save your employees' time** by automating a majority of tasks related to reservations
- Accomplish even very advanced configurations with **no technical knowledge** required

Adresse	4, Long St.
Preis:	CHF 2400.00

planyo® Flexibility

Planyo will work for virtually all businesses taking bookings. It will work whether you are renting rooms or chalets, boats, bikes or cars, or taking bookings for massage therapy or doctor appointments ... or something we haven't even heard of...

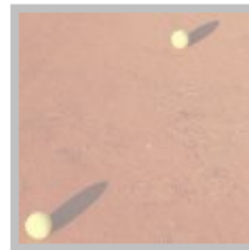

- All texts visible to the customers can be customized (in any of the 19 languages)
- Configure sms or email notifications sent to your customers - they can include invoice or other attachments
- There is no predetermined reservation process you must follow, adjust it according to your needs

Vacation property

Hotel

Tennis court

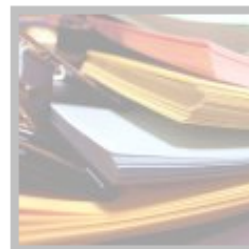

Yacht charter

Therapist

Car rental

Conference room

Driving school

 **planyo**® Risk-free

Check it out yourself. The first 2 months are always free with no obligations and no need to enter your credit card number. If you don't like what you see, move on to another solution. Also later on we don't require long-term commitment.

Our customer support is free so send us an email if you have any problems with the configuration.

Here are some quotes from our existing customers, check out their full feedback and websites in the [customer site of the week](#) section.

"We tried everything for online reservations. Nothing else even came close to the customization options of Planyo"

"Planyo was the clear winner for flexibility and ease of setup when choosing our booking system"

"In a survey we conducted of our booking system users, 98% of those asked rated the system either 'Very Easy' or 'Easy' to use"

"The staff is great and we always get quick help should we need it."

"In summary, Planyo is the best technology investment we have made so far – and the most cost effective."

"Planyo is without question the best reservation / booking system available"

planyo® Integration and extensibility

Planyo can be fully integrated with your website so your customers never need to leave it during the entire reservation process and also post-reservation tasks (adding other products, checking status, cancellations). All this can be done very easily using plugins for the most popular CMS systems including **Joomla, Drupal, Wordpress, Typo3, Modx** and more. If you use another CMS, you can also do the integration with very little effort. Or, if you prefer, customers can be redirected to your personal pages on the planyo website created for you automatically.

Using Google products such as **Google Calendar, Docs** or **Analytics**? Planyo will fully integrate with them or you can also export your calendar via **iCal** to other applications such as Apple iCal or Outlook.

Planyo also offers both frontend for your customers and large parts of the backend in the mobile version to provide great experience for users on the run using **iPhone** or **Android** devices.

planyo® Powerful administration

Planyo can work with the following user roles:

- **Main administrator:** has access to everything
- **Moderators:** have access to all or some functionalities, as set by the main administrator. This role is very useful for the staff members who administer the totality of your company's resources.
- **Resource admins:** can administer only the resource or resources assigned to them. This role is used especially when bookings are for appointments with particular staff members; also here the main administrator can block their access to certain functionalities.
- **Agents:** the main administrator can specify external agents who can enter bookings in the name of their customers; the agents can then check reservation details of these bookings and get reports of their commissions calculated by the system
- **Customers:** according to your wish, your customers can also have logins (Planyo will also use your website's existing login system; this is very nice if your customers often come back to reserve with you) or they can always enter their personal details at each reservation with no login requirement

The system keeps track of administrative actions so you can see which staff member did what and when. The system can also be used for email exchange with customers so your staff members can immediately see the entire context.

planyo® Tailored reservation process

Planyo supports all of these reservation process steps - they are all optional to adapt to your needs:

- You can require your customers to log in or enter special password
- Booking form fully designed by you, including required fields
- You can have your customers verify their email address by clicking a link in an email
- It's up to you to decide at which point the resource becomes unavailable to other customers
- The system can take online payment from customer, full amount or a partial payment. Planyo works with a number of payment gateways such as PayPal, Moneybookers, Authorize.net, SagePay, WorldPay, ServiRed and others, or store customers' card details safely on your server.
- Bookings with no payment made within specified time can be cancelled automatically
- In case of partial-amount pre-payments, you can ask your customers to pay the full amount within specified time
- Bookings can be confirmed manually, after a review by the administrators

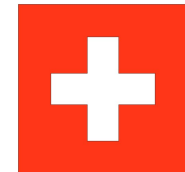

planyo® Cloud-based web service (SaaS)

All reservation data is kept on our servers. You do, however, have a possibility to backup/export all data through reports, **CSV exports into Excel** and for more advanced usage we also offer a **Web API**. This solution has a number of advantages, including:

- There's no software to install, the setup assistant will guide you through the configuration so you can get started within minutes and not days
- The integration with your website is very easy
- This approach increases security: you don't have to worry about backups, viruses, hardware failures etc. We make multiple daily backups and in case of unpredictable events, hardware failures etc. the service switches seamlessly to servers in another geographical location
- Your system is always up-to-date! There's no need to keep track of the latest updates, all new features are available to you instantly

Planyo is developed by Xtreme Sagl. We're a Swiss company providing IT solutions **since 1997**.

planyo® Where do I go next?

- Choose from a number of interactive demos: enter into the backend as the administrator or do a test reservation as end customer. [Click here for the demos](#)
- See real websites of some of our clients in the [customer site of the week section](#)
- Create a Planyo account and test our system without commitment for 2 months. [Click here to sign up](#)
- Have more questions? Check out [our pricing](#) the [frequently asked questions](#) or [contact us](#).
